PRESS NOTE

**PROVISIONAL ESTIMATES OF ANNUAL NATIONAL INCOME, 2019-20
AND
QUARTERLY ESTIMATES (Q4) OF GROSS DOMESTIC PRODUCT, 2019-20**

The National Statistical Office (NSO), Ministry of Statistics and Programme Implementation, has released the Provisional Estimates of National Income for the financial year 2019-20, both at Constant (2011-12) and Current Prices. These are presented in Statements 1 to 4.

2. Quarterly Estimates of Gross Domestic Product (GDP) for the fourth quarter (January-March) of 2019-20, both at Constant (2011-12) and Current Prices along with the corresponding quarterly estimates of expenditure components of GDP are also released. These are presented in Statements 5 to 8. Estimates including growth rates of Q1, Q2 and Q3 of 2019-20 released earlier have been revised in accordance with the revision policy of National Accounts.

3. In view of the global COVID-19 pandemic and consequent nationwide lockdown measures implemented since March, 2020; the data flow from the economic entities has been impacted. As some of these units are yet to resume operations and owing to the fact that the statutory time-lines for submitting the requisite financial returns have been extended by the Government, these Estimates are based on the available data. Consequently, the Estimates (Quarterly as well as Annual) are likely to undergo revision.

4. The Second Advance Estimates (SAE) of National Income for the year 2019-20 were released on 28th February, 2020. These estimates have now been revised incorporating latest estimates of Agricultural Production, Index of Industrial Production (IIP) and performance of key sectors like, Railways, Transport other than Railways, Communication, Banking, Insurance and Government Revenue Expenditure. With the introduction of Goods and Services Tax (GST) from 1st July 2017 and consequent changes in the tax structure, the total Tax Revenue used for GDP compilation includes Non-GST Revenue and GST Revenue. For obtaining Taxes on Products at Constant Prices, volume extrapolation is done using volume growth of taxed goods and services and aggregated to get the total volume of taxes. Early results on the performance of Corporate Sector for April-December 2019 which were used in SAE have been revised on the basis of latest available information. Besides information on indicators like Deposits & Credits, Passenger and Freight Earnings of Railways, Passenger Traffic and Cargo Handled at Airports, Cargo Handled at Major Sea Ports, Sales of Commercial Vehicles etc., available for first 9/10 months of the financial year used in the SAE have been revised with the updated data upto March, 2020.
