Urban Frame Survey
Unit-level data updated till 15th May, 2017

In order to provide the sampling frame of the first stage units (FSUs) in the urban sector for large-scale socio-economic surveys conducted by National Sample Survey Office, Urban Frame Survey (UFS) has been carried out since 1959. In this survey, the entire urban area, as specified in last Census (2011) and subsequently declared by the State Authorities from time to time, is divided into Investigator Units (IU Units) and further sub-divided into UFS Blocks having clear boundary following concepts and definitions as mentioned in the **Guidelines_UFS.pdf**. Presently, UFS is conducted in five-year phases, and in each such phase, all the towns are surveyed.

In the unit level data of UFS, Frame Code – 15 means that the blocks were surveyed during 2007 to 2012 in UFS 2007-12 Phase and Frame Code – 17 means that the blocks were surveyed during 2012 to 2017 in UFS 2012-17 Phase.

For each UFS Block, maximum two area types are provided. The Type of area codes are given below:

Codes for Type of Area: Affluent Area - **AA**, Residential area other Affluent Area - **RA**, Business/Bazar Area including Office Area - **BA**, Slum Area - **SA**, Industrial Area - **IA**, Hospital Area - **HA**, Institutional/Educational Area - **EA**, Prohibited Area - **PA**, Other Area not elsewhere classified - **OA** (maximum of two codes allowed).

For procuring UFS Maps from field offices, please follow the guidelines of dissemination in **Dissemination_UFS.pdf** and for further details write to:
