NATIONAL SAMPLE SURVEY  
TWENTY-SIXTH ROUND : JULY 1971 - JUNE 1972

NUMBER 256/6

CALORIE AND PROTEIN CONTENT  
OF FOOD ITEMS CONSUMED

IN

RURAL AREAS OF HARYANA, JAMMU & KASHMIR PUNJAB AND UTTAR PRADESH<sup>1/</sup>  
AND URBAN AREAS OF MAHARASHTRA

Introduction

1. In its twenty-sixth round of countrywide survey, National Sample Survey Organisation (NSSO) of India collected detailed information on expenditure incurred by a sample household on domestic consumption. Value and quantity of 101 listed items of food consumed during a period of 30 days preceeding the day of enquiry had been collected from the sample households.

2. Appropriate conversion factors<sup>2/</sup> were applied to the quantity of food items consumed for deriving the energy (calorie) and protein (in gm.) content of these. The total number of household members were then converted into consumer units, using the age-sex composition of the household members. All these conversions were done to arrive at the per diem intake of calorie and protein per consumer unit.

3. The general sample design is stratified with two-stage selection within each stratum. The first-stage units are villages in rural areas and blocks in urban areas; the second-stage units are households. The frame is the list of villages as per the 1961 population census for the rural areas, and towns and cities of the 1961 population census sub-divided into blocks are used as the frame for urban areas.

---

<sup>1/</sup> This special tabulation work for the rural and urban areas of various states of India has been taken up by the NSSO to meet the requirement of the Food and Agriculture Organisation of the United Nations (FAO). The results, as and when they are ready, are being published in brochures like the present one. A list of brochures already released and the results contained therein is given in chart-1, page.3.

<sup>2/</sup> The conversion factors were mostly taken from - "The Nutritive Value of Indian Foods and the Planning of Satisfactory Diets" by C. Gopalan et. al. Special Report Series No. 42, Indian Council of Medical Research (1966).

Explanatory note on the Table

4. The estimated number of households in the rural/urban areas of a state has been grouped by two different characteristics - (i) calorie intake per diem per consumer unit and (ii) per capita monthly consumer expenditure. For each of these groups of households the table shows the - (a) number of households in the sample, (b) average size (number of persons) of household, (c) number of consumer units per household, (d) percentage of calorie intake from five broad food groups (e) average intake of calorie and protein (gm.) per consumer unit per diem.

5. The grouping of classificatory characters are as shown below :-

A. Calorie intake per diem per consumer unit group

(1) upto - 1500, (2) 1501 - 1700, (3) 1701 - 1900, (4) 1901 - 2100,  
(5) 2101 - 2300, (6) 2301 - 2500, (7) 2501 - 2700, (8) 2701 - 3000,  
(9) 3001 - 3500, (10) 3501 - 4000, (11) 4001 & above and  
(12) all groups;

B. Per capita monthly consumer expenditure (in rupees) group

(1) 00 - 15, (2) 15 - 21, (3) 21 - 24, (4) 24 - 28, (5) 28 - 34,  
(6) 34 - 43, (7) 43 - 55, (8) 55 - 75, (9) 75 - 100, (10) 100 and  
above and (0) all classes;

[ 00 - 15 means 00 - 14.99, 15 - 21 means 15 - 20.99 and so on ]

C. Food groups

- I- cereals, potato, sugar, jaggery and cereal substitutes;
- II- pulses, nuts and seeds;
- III- milk and milk products; meat, egg and fish;
- IV- edible oils;
- V- fruits, vegetables, spices and prepared food.

6. Two numbers separated by a stop in between and an alphabet after the numbers have been used for numbering tables. The first left hand number represents the number assigned to the particular state after arranging the states in alphabetic order of their respective names. The serial numbers of the states and union territories are given in chart-1. The second number is the expenditure class number as under para 5B; and the alphabet 'R' at the end stands for rural. Thus Table (7.3/R) contains information for rural households of Jammu & Kashmir belonging to the per capita monthly expenditure group Rs. 43-55. Similarly Table (18.0/R) is meant for all rural households of Uttar Pradesh.

7. The number of sample households in each per capita expenditure class and calorie intake group has been shown in the Table. The estimates need be used with caution wherever the sample size is too small. In such cases adjacent groups may be combined to increase the reliability of the estimates.

CHART-1 : REFERENCE OF RESULTS RELATING TO DIFFERENT STATES PRESENTED IN THE SERIES OF BROCHURE NOS. 258/1 TO 258/6

state/union territory	serial number of state/union territory	brochure number	
		rural	urban
(1)	(2)	(3)	(4)
