Terms and Condition for use of the software

The general Terms and Conditions which include the unit level data supplied, poolability tests software and pooling software are as follows:

1. The user confirms that she/he understands and agrees to be bound by these Terms and Conditions with respect to all use and handling the software and data.
2. The software operates on unit level data of NSS 66th round as per the central layout (given) and installable in Windows XP or Windows 7, 32-bit Operating System.
3. The user gets a non-exclusive right to use the software and data.
4. The user is not entitled to decompile or disassemble the software or information or material connected to the software.
5. NSSO has developed the software and placed it in public domain for the benefit of the users. Hence users are not entitled to get any patent/copyright of the entire or any part of the software and data. The ownership of the software solely lies with NSSO.
6. The software is tested in Windows XP or Windows 7, 32-bit Operating System. NSSO will not be liable to any damage caused/unforeseen events during its installation and use.
7. As the software is provided on as-and-where basis, NSSO cannot provide any software support for its modification/customisation.
8. The user has to ensure that confidentiality of the unit level data shall be maintained and adequate precautions would be taken for not disclosing the identity of the units directly or indirectly.
9. The software or any of its modified/customised versions and the unit level data cannot be used for any commercial purpose.
10. The data shall be used after understanding the concepts, definitions, design and coverage of the survey for a proper appreciation of the limitations and nature of the data and for obtaining meaningful estimates and results.
11. The software or any modified version based on the software being shared would be shared free of cost with the condition of no use for commercial purpose.
